PROFESSIONAL SUMMARY

Result-driven Backend Engineer with 1.5+ years of experience in architecting scalable **Multi-tenant ERP and Fintech solutions**. Proven track record of reducing manual operational costs by **70%** through automation. Expert in **PHP, Laravel, AWS, and CI/CD**, focusing on high-performance database optimization and secure financial workflows

PROFESSIONAL EXPERIENCE

PHP Developer NegoIT (PVT) Ltd

March 2026 – Present

- Leading end-to-end development of a high-traffic ERP/POS system using complex PHP and MySQL architectures.
- Architecting scalable AWS cloud solutions and integrating advanced accounting services for enterprise-level business operations
- Leading technical teams and mentoring developers while managing large-scale legacy systems with modern optimizations.

Backend Software Engineer (Laravel / PHP) Freelance — Remote (Malaysia & Sri Lanka)

Nov 2025 – March 2026

- Architected and Scaled, and maintained ERP, POS, MLM, and e-commerce systems using Laravel, PHP, and MySQL, supporting real business operations in production environments.
- Implemented multi-tenant architectures, handling company/branch-level data isolation, permissions, and business rules.
- Optimized database performance using query refactoring, indexing, and transactional logic, improving reliability under concurrent usage.
- Managed deployments on AWS and shared hosting (Hostinger), handled bug fixes, feature delivery, and production issue resolution independently in a remote setup.

Software Engineer (Junior) Appleholidays Destination Services (PVT) Ltd

March 2025 – Oct 2025

- Contributed to the development and maintenance of a multi-tenant ERP system for accounting, invoicing, and financial tracking using Laravel, React, and MySQL.
- Implemented backend business logic for finance modules, data validation, and reporting workflows.
- Assisted in AWS-based deployments, monitoring system stability, security, and uptime in production environments.

Software Engineer (Internship) Appleholidays Destination Services (PVT) Ltd

Oct 2024 – March 2025

- Developed responsive web features using Laravel, React, and Next.js for internal business systems.
- Assisted in database optimization for MySQL and MongoDB, improving query efficiency and response times.

- Supported the setup of CI/CD pipelines using AWS and Kubernetes, gaining hands-on exposure to automated deployments and DevOps workflows.

EDUCATION

Bachelor of Information And Technology

Feb 2020 – Sep 2024

University of Colombo School of Computing, Sri Lanka

CORE COMPETENCIES & SKILLS

- **Programming Languages:** PHP, JavaScript, SQL (MySQL, PostgreSQL, MS SQL Server), HTML5, CSS3
- **Frameworks & Libraries:** Laravel, React.js
- **Databases & Data Management:** MySQL, PostgreSQL, MongoDB (familiar with Redis, Firebase)
- **Cloud & DevOps Tools:** AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins, GitLab CI), Hostinger
- **Version Control & Collaboration:** Git, GitHub
- **Software Engineering Concepts:** OOP, Data Structures & Algorithms, RESTful API

ACADEMIC PROJECTS & DEVELOPMENT

ERP System for Multi-Company Management.

Technologies: Laravel, React, MySQL, AWS, Sanctum Auth

- Architected a multi-company ERP, automating finance workflows that reduced manual effort by 70% and improved accuracy.
- Engineered comprehensive accounting modules for real-time P&L tracking, accounts payable, and cross-company financial reporting.
- Deployed a secure, scalable multi-tenant system on AWS featuring automated tax calculations and centralized data management.

Automated CI/CD Pipeline for Spring Boot Deployment on AWS

Technologies: Jenkins, Docker, Kubernetes (EKS), Terraform, AWS, SonarQube, Trivy, Nexus, GitHub, Maven, Spring Boot, MySQL, Prometheus, Grafana

- Developed a fully automated CI/CD pipeline with Jenkins, Docker, and Kubernetes. Ensured seamless, zero-downtime deployments with good reliability.

Sales, Purchase, Inventory, and Repair Management System

Technologies: Java Spring Boot, Hibernate, Thymeleaf, Spring Security, MySQL, Bootstrap, JQuery

- Engineered a Spring Boot solution for sales and inventory tracking. Improved efficiency by 80% through automation and real-time data accuracy

LANGUAGES

- English – Professional Proficiency
- Sinhala – Native Proficiency
